EDUCATION

Intermediate

Bahria College Karsaz
2020 - 2022

Certified Cloud Applied Generative AI Engineer

PIAIC
2024 Present

Governor Initiative for Artificial Intelligence, Web 3.0 and Metaverse.

2022 - 2024 Present

SKILLS

- UI/UX
- Typescript
- Python
- Sanity
- Html, CSS, Tailwind CSS
- Next.js
- React

WORK EXPERIENCE

Lead Student

Freelance | Oct 2023 – Present

I have been designing and developing scalable web applications using Next.js, TypeScript, JavaScript, HTML, and CSS. My expertise lies in creating dynamic, responsive front-end interfaces while ensuring smooth backend functionality with API integrations, authentication systems, and database management using PostgreSQL. I have deployed applications using Vercel and GitHub, optimizing performance and maintaining version control. Additionally, I collaborate with clients remotely, delivering tailored web solutions that meet business needs.

Governor House Leadership Program | Aug 2022 – Jan 2024

I was selected as a Leader Student, where I mentored peers in web development, coding best practices, and problem-solving techniques. I conducted technical training sessions, improving team collaboration and project execution. My leadership role involved guiding students through modern web technologies and helping them enhance their technical skills through hands-on learning and real-world projects.

PIAIC | Jan 2024 – Present

where I have successfully completed Quarter 1 in Generative AI & Cloud Native Technologies. This has allowed me to specialize in full-stack development, API integrations, cloud computing, and scalable application architecture. Through this program, I have gained in-depth knowledge of AI-driven applications and modern web development strategies, further refining my ability to build high-performance solutions.

PROJECTS

Hackathon 2

Nike E-Commerce Marketplace

Built a Nike e-commerce marketplace with Next.js, TypeScript, and Sanity CMS, featuring real-time product updates, custom shoe builder, secure payment gateways, and user authentication. Deployed on Vercel with optimized SEO and CI/CD pipelines.

GitHub: [<https://github.com/MuhammadMomin095?tab=repositories>]

Vercel: [<https://hackathon-2-xi.vercel.app>]

SportSphere

A Next.js and TypeScript-based e-commerce platform for sports merchandise, featuring real-time product updates, secure payments, and SEO optimization.

GitHub: [<https://github.com/MuhammadMomin095/SportSphere.git>]

Vercel: [<https://sport-sphere-kappa.vercel.app>]

Perfume Website

An e-commerce website built with Next.js and TypeScript, offering a seamless shopping experience for perfumes, with real-time updates, secure payments, and user authentication.
